UPCOMING EVENTS

10/26 – Leadership Meeting & Happy Hour

12/2 – Tacky Sweater Crawl

ACFL is the commercial development occupying the former site of the Boeing Company in Wichita, Kansas. Comprised of 324 acres of flight line and an 88-acre office park, this location is ideally suited for companies serving the aviation, aerospace and information technology industries.

ATLAS is a multi-disciplinary manufacturing environment and engineering education program to prepare engineers and educators for the Factory of the Future and to aid the current workforce in seamlessly adapting to advancements in the workplace.

NIAR WERX, a division of Wichita State University's National Institute for Aviation Research, provides engineering, modification/repair/overhaul, environmental test and flight test/certification services.
