On September 25th DBIA will have the unique opportunity to tour the new Wichita Water Treatment Plant. This new facility will have the ability to treat up to 120 Million gallons of water per day, and the value of this project is over \$550 Million. It is the largest project ongoing in Wichita.

This project is a great example of a current Design Build project under construction in Wichita.

There are limited spots available, register today!

***Please be aware this is an active jobsite; all attendees should bring their own PPE. This includes sturdy work boots (no tennis shoes), hardhats, safety vests, eye protection and gloves ***
